

Various case scenarios of the services of Customs2Trade.

GO TO MARKET SUPPORT

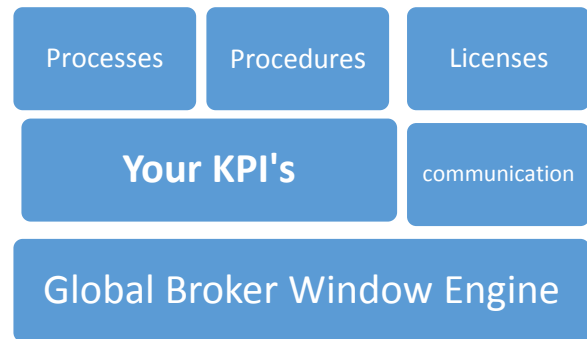

When you are looking to enter new markets, logistics service providers do not usually support import- and export activities and/or brokerage. Customs2Trade can, through its extensive network, search Importers and Exporters that can be included within your supply chain, preventing you from having to establish your own local company. The full service contains:

- Search IOR/EOR companies
- Search Customs Brokers
- Assess these partners against your requirements
- Develop import- and export procedures
- Implement procedures and processes and test
- Maintain procedures and processes
- Manage IOR/EOR and Customs broker through our Global Broker Window and KPI's

GLOBAL BROKER MANAGEMENT

International survey's from Trade Professionals globally indicate that the majority of time spend is related to broker management and classification, preventing them to take a more strategic approach towards trade compliance- and management.

Our automated Global Broker Window can support delivery of compliance data which enables your staff to focus on higher level activities. Other benefits:

- ✓ Managing compliance (risks) within the supply chain through automated reporting with dash boards
- ✓ Creating quick insight into compliance risks, disruptions, and broker performance
- ✓ Allows internal trade resources to focus on higher level value add activities (sales support and training, roadmap developments, go to market)

- ✓ Provides complete insight in import cost spending, allowing to optimize, correctly forecast budgets, trending analysis, country comparison
- ✓ Provides full KPI to allow optimization and efficiency improvements
- ✓ Can be easily complemented with other trade building blocks offered by us, like license management, classification, AEO
- ✓ Is effective to support your internal audits and external audits in data delivery and can be used for remote virtual audits
- ✓ Is flexible to receive different data formats as input, can be customized with regards to dash boards
- ✓ Supports implementation depending on maturity of organization and trade management

Customs2Trade can deliver:

- Import Management
- Export Management
- Full Managed Service

Either as a complement to your team(s) or by taking over these activities in absence of a team. So if you:

- *Look to understand your compliance*
- *Have difficulty managing import budgets*
- *Need to expand into new markets*
- *Face disruptions in your supply chain*
- *Face delays in delivery*
- *Have disparate systems to deliver data*
- *Need to perform audits*
- *Need a supply chain assessment against regulatory requirements*
- *Need Strategic plans to be developed for Trade Compliance- and management*
